THE AMERICAN INQUISITION 1945-1960 Cedric Belfrage

Hiss, the Rosenbergs, Lattimore. The names are familiar, but the torture and the pain have dimmed. Cedric Belfrage remembers. He has lived in exile from the United States for nearly twenty years—deported for refusing to cooperate with Joe McCarthy's Committee. Here is his powerful chronicle of the long dark night of the American conscience. A revelation of its roots deep in our history. And a warning for our future.

"A witty, literate and vastly informed history of the whole phenomenon . . . Belfrage is dazzling."—*Publishers Weekly*

"An altogether horrifying and terrifying world whose outlines are here recorded . . . It is a book that is a service to history and humanity."—MAXWELL GEISMAR

"Caustic, fresh and extensive. . . . An impressive collage combining moral force with a memorable sense of irony."—*Kirkus Reviews*
